

DETERMINING THE UA PILOT'S MAXIMUM VISUAL LINE-OF-SITE DISTANCE

Factors that affect a UA pilot's ability to maintain constant visual observation during in-flight operations.

EYE HEALTH

your eyesight, including the health and function of the eye itself.

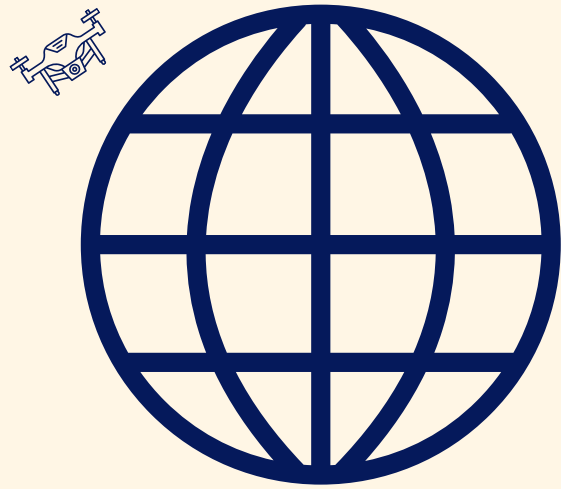

OBJECT SIZE

the size of the object that you're viewing.

EARTH'S CURVATURE

the curvature of the Earth limits distance vision.

LINE-OF-SITE OBSTRUCTIONS

any obstructions in your line of sight.
